INTRODUCTION

Project Title	Amazon Clone
Abstract	This is a Amazon Shopping Site's clone Here you can able to purchase your products.
Languages Used	HTML, CSS
Project Type	Desktop Application

The Amazon Clone provides a multi-vendor eCommerce marketplace via which the vendors and the users can communicate and sell/ buy products. Here we can able to add your items to the cart and also able to

purchase the products using your card via stripe payment method.

APPLICATION FEATURES

- It allows users to browse and purchase products, track orders, leave reviews, and more.
- The users can browse for products and can place an order if the product is suitable.

- The amazon clone app allows for easy return and exchange if required by the customer.
- There are many different categories products are available on amazon such as Fashion, Groceries, Electronics, Health etc.

PURPOSE:-

It mainly for the customer, where the customer can find and discover anything they might want to buy online, and endeavors to offer its customers the lowest possible prices.
